per	esent, Soviet activities in relation to Yugoshavia have not gone youd the propaganda and pressure stage.
Kov of the	pak, an ex-Soviet guerrilla leader, has been given overall command Comminform troops throught the world. This report states further it:
	Gen. Kovpak currently maintains headquarters "sorowhere in Albania but often travels secretly through the areas under his command.
b.	The scope of Kovpak's command ranges from releas in open warfare to secret semi-military units in Western Europe. All active Cominform fifth-column work on a para-military basis is supervised by him. His instruction of secret semi-military Cominform units in Western Europe is based largely upon training activities of nucleus groups of Communist refuses
c.	Kovpak's current major task is the organization of preparations for civil war in Yugoslavia directed against the Tito regime.

Kovpak was last mentioned, in Kommunist Tadzhikistana of 8 July 1949, as a member of the delegation to Dimitrov's funeral in Bulgaria. The confusion over whether it is Konev or Kovpak who is in command of Cominform forces is possibly attributable to the

similarity of names. Of the two, Kovpak would appear to be the more likely one. Inasmuch as Konev is Commander-in-Chief of Soviet Ground Forces, it is improbable that he is also commander of the Odessa MD. On the other hand, Kovpak, who has been in the Ukraine for some time and has been Deputy Chairman of the Praesidium of the Ukrainian SSR since early 1947, might have been given this assignment. This would mean that Marshal Zhukov, last commander of the Odessa MD, had been removed; Zhukov was last identified as still being in Odessa as of 16 May 1949 but was reported at the beginning of June 1949 to have been given command of the Ural MD.)
